PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building scalable mobile and web applications using Flutter, Python, Django, and REST APIs. Strong backend focus on role-based access control, multi-tenant systems, scheduling automation, payroll workflows, and transaction-driven business logic. Experienced in owning products end-to-end, from system design and API development to frontend implementation and UI/UX. Graduating in 2027 and seeking junior full-stack or backend-focused developer roles.

PROJECTS & EXPERIENCE

AI Shift Management & Payroll Platform

Full-Stack Developer | Independent Project

- Designed and built a multi-tenant workforce management platform using Python-based REST APIs with strict role-based access.
- Developed a Flutter mobile application used by managers and employees across multiple stores.
- Implemented fixed weekly scheduling (Friday–Thursday) with automatic locking and immutable audit history.
- Built AI-assisted scheduling to fill understaffed shifts, detect conflicts, and flag overtime risks.
- Implemented geo-fenced clock-in/out with out-of-zone tracking and correction workflows.
- Built payroll logic separating per-store hours with accurate combined totals.
- Backend fully implemented; frontend partially implemented with core scheduling and clocking screens.
- **Tech Stack:** Flutter, Python, Django, REST APIs

Loyalty & Ordering Mobile Application (7-Eleven–Style)

Full-Stack Developer | Independent Project

- Built a scalable loyalty and ordering platform using Flutter and Django.
- Designed the system to scale to 60+ stores with store-specific menus.
- Implemented build-and-pickup food ordering and real-time kitchen pickup screens.
- Implemented barcode-based POS validation for deals and rewards.
- Owned system design, API development, frontend implementation, and UI/UX.
- **Tech Stack:** Flutter, Python, Django, REST APIs

Self-Ordering Kiosk System (McDonald’s–Style)

Full-Stack Developer | Independent Project

- Built a store-based self-ordering kiosk system scalable to 60+ stores.
- Developed a web-based admin panel for menu and store management.
- Built a Flutter-based kiosk app for in-store ordering screens.
- Designed REST APIs for kiosk, admin panel, and backend integration.
- Backend production-ready; Flutter kiosk app partially implemented.
- **Tech Stack:** Flutter, Python, Django, REST APIs

TECHNICAL SKILLS

Frontend: Flutter, HTML, CSS

Backend: Python, Django, REST APIs

Systems: Multi-tenant architecture, role-based access, scheduling, payroll, geo-fencing

Tools: Git, GitHub, VS Code, Postman

EDUCATION

Bachelor of Science – Computer Science & Information Technology

Monroe College, Bronx, NY | Expected Graduation: 2027

RELEVANT COURSEWORK

Data Structures & Algorithms, Web Application Development, Database Management Systems, Software Engineering, Information Systems

ADDITIONAL INFORMATION

Languages: English, Hindi, Urdu, Telugu

Interests: System design, backend architecture, automation
